STATEMENT OF WORK #3

THIS STATEMENT OF WORK #3 (the "**Statement of Work**") by and between **CYBIN IRL LIMITED** ("**Client**") and **A2-AI LLC** ("**Service Provider**"), will be effective as of the last date of signature below, and upon execution will be incorporated into the Master Services Agreement between Client and Service Provider dated August 15, 2025 (the "**Agreement**"). Capitalized terms used in this Statement of Work will have the same meaning as set forth in the Agreement.

Client hereby engages Service Provider to provide Services, as follows:

1. Services.

Background and Objectives:
Client requests that Service Provider conduct time-matched, concentration-QT interval analysis (C-QT) for Client's CYB003 Program. The purpose of this C-QT analysis is to develop a concentration-QT model to quantify the relationship between concentration and heart rate corrected QT interval (QTc) to predict cardiac safety under clinically relevant exposures. The purpose of this analysis is the following:

- To assess consistency in the concentration-QTc relationship between CYB003 and psilocin
- To quantify the concentration-QTc relationship for CYB003
- To predict QTc impact of CYB003 in the high clinical exposure scenario to support request for waiver of TQT study

CYB003 is a synthetic, deuterated isotopomer of psilocin, being developed by Cybin for the treatment of MDD. Psilocin is the active metabolite of psilocybin responsible for the psychedelic effects of the parent compound.

Analysis Studies Overview:

- **CYB003-001 (N≈40):** A Phase I/IIa, Randomized, Double-Blind, Placebo-Controlled Study to Assess Safety, Tolerability, Pharmacokinetics and Pharmacodynamics of Multiple Ascending Oral Doses of CYB003 in Participants with Major Depressive Disorder
- **CYB003-102 (n≤48) -** A Phase 1, Randomized, Single-blind, Placebo-Controlled, Dose Escalation Study to Assess the Pharmacokinetics, Safety and Tolerability of Single Oral Doses of CYB003 in Healthy Participants

Data Standards**:**
Source data for the analysis is expected in structured, machine-readable data formats (e.g., csv, xlsx). CDISC-compliant formats (SDTM and ADaM) are preferred, if available.

- Additional data cleaning fees may apply depending on the quality of data provided

Teleconferences between Client and Service Provider will be held on a regular basis, and project progression will be shared.

Description of Services:
Concentration-QT interval analysis will be performed to quantify the relationship between concentration and baseline- and heart rate-corrected QT interval (ΔQTc) to predict cardiac safety at therapeutic and supra therapeutic exposures at clinically relevant doses.

Analysis Endpoint:

- Baseline- and heart rate-corrected QT interval (ΔQTc) as assessed by triplicate 12-lead electrocardiogram (ECG) or Holter monitoring

Docusign Envelope ID: 700005BA-C5E8-40FF-B560-80BF629B566E

Project Management:
Service Provider will assign a Project Manager and/or Project Lead to handle the following:

- Data transfer support between Service Provider and Client
- Managing project relevant timelines
- Project communication and regular meeting management
- SharePoint setup for secure file sharing
- Maintain records of information shared and minutes relevant to project

Deliverables:

- PowerPoint Slides Summarizing Simulations and Results
- Brief Technical C-QTc Report

2. Materials.

Materials will be decided upon between Client and Service Provider.

3. Completion Timeline.

Term:
The Term of this Statement of Work will **continue until agreed completion of the project scope and deliverables.** The term may be extended upon written agreement by both parties.

Project Timelines:
The project will begin with data transfers via a secured data transfer between Service Provider and Client. Following receipt of data, Service Provider will review the data for any queries to submit to Client for correction or clarification (e.g., inconsistencies, outliers, potential errors).

Data delivery is anticipated **upon an agreed date between Client and Service Provider.** The analysis will be completed in two phases: initial analysis with CYB003-001 study data and final analysis following completion of the CYB003-102 study. The estimated project timeline:

- From initial data transfer: **6 weeks** to summative slides
- From final data transfer: **8 weeks** to draft report

4. Service Provider Key Personnel.

Project Leader: Ryan Crass, PharmD - Executive Director, Pharmacometrics - ryan@a2-ai.com

- Other Consultants as needed

Administration Contact: Eric Storms - Business Manager - bd@a2-ai.com
Payment Contact: Meghan DeLaunay - Finance Specialist - Accounting@a2-ai.com

5. Client Representative.

Geoff Varty, Sr VP, Research & Clinical Sciences. Geoff@cybin.com

6. Compensation.

The total compensation due to Service Provider for Services under this Statement of Work will not exceed **NINETY-NINE THOUSAND U.S. DOLLARS ($99,000 USD)**. All amounts due under this Statement of

Docusign Envelope ID: 700005BA-C5E8-40FF-B560-80BF629B566E

Work will be invoiced in United States Dollars to the attention of Geoff Varty, SVP, Research & Clinical Sciences and David Wood, Senior Account Manager at accountspayable@cybin.com as follows:

Project Fees:
The maximum project cost is **$99,000 USD**. The itemization of costs is provided in Table 1.

Table 1: C-QTc Analysis – Itemized Pricing and Timeline

Project Component	Timeline	Total Price
Project Management		
Project Management	Ongoing	$3,000
Exploratory C-QTc Analysis Including • 1 study: CYB003-001 • 1 endpoint: ΔQTc	**Upon Initial Data Transfer (DT)**	
Analysis Dataset Assembly • Includes: Plasma CYB003 concentrations, ΔQTc • Deliverables: Analysis dataset and data definitions	IDT + 2 weeks	$5,000
Exploratory Data Analysis • Includes: Exploratory assessments to characterize the analysis population, assess the c-QTc relationship, and evaluate model assumptions • Deliverables: Slides summarizing preliminary results	IDT + 4 weeks	$5,000
External Predictive Assessment of Published c-QT Relationship for Psilocin • Includes: Overlay plots and summary tables comparing published model predictions to the observed data • Deliverables: Slides summarizing preliminary results	IDT + 5 weeks	$5,000
QC Efforts	IDT + 6 weeks	Included
Full C-QTc Analysis Including • 2 studies: CBY003-001, CYB003-102 • 1 endpoint: ΔQTc	**Upon Final Data Transfer (FDT)**	
Analysis Dataset Assembly • Includes: Plasma CYB003 concentrations, ΔQTc • Deliverables: Analysis dataset and data definitions	FDT + 2 weeks	$10,000
Exploratory Data Analysis • Includes: Exploratory assessments to characterize the analysis population, assess the c-QTc relationship, assess suitability of data for pooled analysis across studies, and evaluate model assumptions • Deliverables: Slides summarizing preliminary results	FDT + 4 weeks	$10,000
Model Development • Includes: Pre-specified c-QTc linear mixed effects model, or alternative model forms if assumptions are not valid • Deliverables: Slides summarizing preliminary results	FDT + 6 weeks	$20,000
Model Applications • Includes: Model-based predictions of ΔQTc and ΔΔQTc at clinically relevant average and high exposure scenarios	FDT + 7 weeks	$10,000
QC Efforts	FDT + 8 weeks	Included
Analysis Documentation	**Upon Contract Execution (CE)**	
Analysis Plan (MAP) • Includes: Final methods for both phases of the analysis • Deliverables: Word and final signed PDF documents	CE + 4 weeks	$11,000
Delivery of Brief Technical C-QTc Report	FDT + 8 weeks	$20,000

Docusign Envelope ID: 700005BA-C5E8-40FF-B560-80BF629B566E

Total Fees (*Max Hours: 396)	**$99,000**

*If the Max Hours for the decided scope are exceeded in Table 1, or work goes outside of expected scope, a change order may be processed.

Invoicing and Payments

Service Provider will invoice Client according to the following schedule:

- 20% of the total project cost (**$19,800**) upon execution of this Statement of Work.
- Upon completion of each individual component listed in Table 1, subtracting the initial payment.

All pass-through costs must be approved in advance in writing by Client and will not include any administrative or other additional charges. Amounts due for pass-through costs will be invoiced in the billing cycle first following the date they are incurred, and invoices will indicate which costs are pass-through costs. Payment will be made in accordance with Section 4 (Compensation) of the Agreement. Service Provider agrees that the amounts payable or otherwise provided by Client under the Agreement represent the fair market value of the Services and have not been determined in a manner that accounts for the volume or value of any referrals or business.

All terms and conditions of the Agreement will apply to this Statement of Work. In the event of any conflict between this Statement of Work and the terms of the Agreement, the terms of the Agreement will control. A portable document format (".pdf") copy of this Statement of Work, including the signature pages, will be deemed an original.

Docusign Envelope ID: 700005BA-C5E8-40FF-B560-80BF629B566E

IN WITNESS WHEREOF, this Statement of Work has been executed by the Parties hereto through their duly authorized representatives as of the date set forth below.
